

Solicitation is solicitation! Informing me that I have won a contest, if I will only buy or "donate" money or pay for "shipping & handling" or I can receive several days and nights at some destination if I will agree to attend a meeting to listen to a promotion, is still a solicitation which is not welcome in my home or business!!! Just because a call originates from a radio or T.V. station does not make the call any more welcome.

Nuisance calls are equally as noxious as spam, junk mailings and un-solicited FAX messages.

Please stop the harassment of being bombarded with un-requested information.

If I want this kind of information I can monetarily purchase newspapers or magazines, or turn on a T.V. or radio station and saturate my life with "extra" garbage. Very little (percentage wise) of the "extras" enhance my life in any way. I consider it an enormous BLESSING when I can reach out and turn off a program or simply not purchase a publication which does not appeal to me. Why do I have to be subjected to any other aggravation? Help solve the problem by reducing the amount of unwanted information!

Please consider the impact on the public, and not just business when you make these decisions.

Warily watching further developments,  
K.Klingbeil
